Just a heads up. We received some information concerning their current agreement to mitigate for the surface area (and I guess some road). He mentioned to a team member here that he would be contacting the BLM to discuss some changes. As far as I remember, though, the agencies involved are BLM and DWR. Before any changes are recommended, I think that we should discuss this matter with DWR to see what their wildlife mitigation ratio is for the wildlife that were considered for the writing of the EA. Also, what is BLM's mitigation ratio? Another thing, can one change their agreement to mitigate if they make changes to the plan from which the EA is based? Would the EA need to be amended?
